DSOFT

Build software solutions that bring clients' needs and satisaction

Solve challenging technical problems with our clients

Parking Management

Smart Parking's RFID solutions enable you to manage permit parking easily. Permit holders are happier as more space becomes available through improved enforcement and fact-based planning.

Tickets are printed using a thermal printer, which gives clear and visible printing results.

Portable Tracking and Payments

With the handheld and portable printer machines, you can easily accept presence payments remotely, print receipts, and the most important feature is to track the valet drivers via their tags.

PARKING & VALET PARKING MANAGEMENT

Our software manages parking ticket and permit information from the point of issue to the final disposition.

Sotware Includes
- Dashboard & Log.
- Member management.
- Rate management.
