SOTWARE AND HARDWARE SOLUTIONS
Stock & POS Management

D S O F T

DSOFT

Build software solutions that bring clients' needs and satisaction

Solve challenging technical problems with our clients

Stock Management

is the administrative role of assessing the inventory of a business and making sure it is sufficient to meet consumer demand.

Our software includes tracking and accounting for the items you sell, use or manufacture.

To manage and control your stock you can label your items with either barcoded tags or RFID tags.

You can follow up with the items in stock, payments, expenses of your company using the stock management reports.

STOCK & POS MANAGEMENT

Using POS system will manage your stock and automatically update the items in the stock and controls all the payments (suppliers and customers).

Sotware Includes
- Company Configuration.
- Branches management.
- Employee management.
- Suppliers' information and payments.
- Customers' information and payments.
- Accounting management.
- Account reports.
- Clients' reports.
- Invoice reports.
- Items history.
- Company expenses.
